## REPORT OF SUPERINTENDENT OF SCHOOLS.

To the Selectmen of the Town of Hollis, N. H. for the year ending March 1, 1877.

*Gentlemen,* I am very glad in presenting my report to be able to refer to the schools throughout the town as having been in the main very successful. The teachers have been very largely, persons of mature experience and sterling worth. There has been felt very little dissatisfaction, or been found very little ground for complaint. By far the greater number of terms taught have been with marked success, and a high standing of deportment exhibited by the pupils. We think a marked impetus has been given and result attained toward a standard of deportment and scholarship such as ought to characterize, at this day, all the pupils in attendance.

Insubordination on the part of pupils, manners or morals detrimental to the best interests of the whole, should find no support from public sentiment, and does not, we know, with very rare exceptions, from the public sentiment of this town. To trample upon the benefits offered by our public schools and to disturb their successful course of teaching and study, should bring shame to the person as it must bring disgrace to the family. Such cases have been very few, there ought, there might be, none. The fewness thereof makes the reproach all the keener. Let our schools be the fostering places of manly and womanly qualities; without these, our young people are sadly unready for the battles of life.

If Districts No. 2, and 7, could unite their pupils and money we think it would be greatly to the advantage of both.

The Superintendent is embarrassed sometimes by arrangements having been too fully consummated before the teacher comes before him, also certificates are not returned to him by

teachers in some cases as the law directs, and no teacher has received from him a certificate of such return previous to receiving their pay. Embarrassment might arise to the committee growing out of this, as it does now arise to the Superintending Committee. We can but heartily congratulate the town and the young pupils scattered throughout its domain on the successful adjustment of interests, whereby the benefits to accrue from the legacy now awaiting reception, shall very soon be enjoyed, and felt, we firmly believe for good, in all our schools. Some school buildings would be greatly improved and every interest promoted by much needed repairs, and suitable furnishings provided for school work. All these surroundings are cultivating and refining, and no money is better expended than that laid out reasonably upon buildings and appointments. There are some text books in use in our schools that have been long since laid aside from other schools and which are universally unsatisfactory to teachers and pupils. I refer especially to the Grammar and Reader now used, in the Geographies, also, great embarrassment arises from the unlikeness that exists in books of the same grade. Questions and text have been so changed that practically the pupils are studying two distinct books. There can be made however a change only in one text book in a single year. The expense to parents and friends growing out of such changes, when required, is nothing compared to the advantage of a good book in the hands of a competent teacher and industrious pupils. Great care ought hence to be exercised before any new book is introduced. Books that have been tried and approved, practically, would always be best adopted in a place like this.

Whole number of children in town between the ages of five and fifteen, males 71, females 75.

H. L. KELSEY, Sup't.

Hollis, March 1, 1877.
